Systems Integrators

ACI Worldwide
Datacard Group
Hitachi Europe Ltd.

ACI Worldwide

ACI has a proven history of delivery. With more than 30 million smart cards handling multiple applications globally, and around 20 billion transactions facilitated by ACI's expertise every year, no other company is doing more to bring the future of card solutions in the present day.

Our electronic commerce and electronic ID solutions, including Smart Chip Manager and BASE24, are trusted by more than 500 customers in over 80 countries, world-wide (including more than 100 of the world's top 500 banks and multiple governments).

ACI offers unrivalled expertise in the successful implementation and exploitation of the MULTOS platform both in the banking area as well as in Government – such as the Hong Kong Smart ID Card System.

Therefore, ACI is the ideal technology partner on the journey to realizing the potential of MULTOS and full MULTOS implementation.

ACI offers its clients integration services to implement the smart card system into the client's legacy environment. These services cover project management, testing and migration into production systems.

Datacard Group

DatacardGroup

About Datacard's Multi-application Solutions

Datacard offers a range of solutions to help companies who want to capitalize upon the power and business benefits of multi-application smart cards to make a smooth and cost-effective transition to the technology.

We offer the industry's only fully integrated infrastructure, consisting of hardware, software and systems for the issuance and management of multi-application smart cards. Our smart card portfolio features a wide range of solutions, including complete smart card personalization architectures to collect, create, and personalize the additional data essential to smart cards, plus systems for the life cycle management of multi-application smart cards.

Solutions for smart card personalization and issuance

Datacard offers solutions for High volume, High speed, and Low-volume (or pilot) card issuance. These solutions enable card issuers to generate chip data, load applications and personalize cards, such as M/chip as the base application on a MULTOS or GlobalPlatform™ card, utilizing the well-known P3 and Smart Card Personalization Manager (SCPM) technology, plus printers from desktop versions to the industry-renowned Datacard 7000 and 9000 machines. We also offer integration, testing, training and implementation support.
